

Foundational & Awareness Workshops

➤ This section is perfect for anyone starting their BIM journey or wanting to correct misconceptions. Ideal for engineers, project managers, fresh graduates, and company owners who want a clear understanding of BIM.

- How it's used in real projects
- What BIM is
- How it reduces errors, time, and cost

Workshop Code	Workshop Topic	Workshop Duration	Workshop Description
BRA-P01_A00	BIM Made Simple: Your Practical Introduction	6 Hours	A clear, beginner-friendly introduction to BIM concepts, terminology, workflows, and value. This is the essential starting point for anyone planning to join advanced or specialized workshops.
BRA-P01_A10	BIM for Leaders: Smarter Decisions at the Top	6 Hours	Shows decision-makers how BIM improves planning, contracting, team readiness, and digital delivery.
BRA-P01_A20	BIM for Owners & Developers: Maximize Value, Minimize Risk	6 Hours	Focuses on ROI, digital twins, and how BIM strengthens investment, reduces risk, and improves lifecycle performance.
BRA-P01_A30	BIM in Action: Smarter Construction Projects	6 Hours	Explains how BIM improves site efficiency, reduces risk, supports change management, and boosts tender success.
BRA-P01_A40	Future-Ready BIM: Advanced Awareness for University Students	6 Hours	Introduces advanced BIM concepts, CAD-to-BIM transition, key tools, parametric design, and lifecycle BIM.
BRA-P01_A50	UAE BIM Guide for Engineers	6 Hours	Practical guidance to apply BIM across the project lifecycle with focus on ISO 19650 workflows and UAE mandates.
